Clinging Suckers When a grindylow Grabs a creature larger than itself, it attaches to that creature. The grabbed creature is not immobilized, but if it moves, the grindylow moves with it. If the creature is Medium or smaller, it takes a -5-foot status penalty to its Speeds while the grindylow is attached. The grindylow is flat-footed while it is attached to a creature.

Jet 🎲🎲 (move) The queen moves up to 60 feet in a straight line through the water without triggering reactions.

This +1 *returning trident* is carved from the jagged, scrimshaw-carved tusk of a narwhal and attached to a 50-foot length of woven sinew. Ranged attacks made with this weapon while underwater or against an underwater target do not have their range increments halved unlike other ranged weapons.

This ferocious grindylow queen leads the aberrant clan on Bonewrack Isle.
